Question No. 1 When you install Active Directory drivers, you must choose an authentication method. Authentication identifies the driver shim to Active Directory and, potentially, to the local machine. Which statements are true regarding the Negotiate authentication method? (Choose 2.)
A. This is the preferred authentication method.
B. This can be installed on a server that is not a member of the domain.
C. This uses Kerberos, NTLM, or a pluggable authentication scheme if one is installed.
D. This is used when the server hosting the driver shim is not a member of the domain.
E. When using this, some provisioning services, such as Exchange mailbox provisioning and password synchronization, are unavailable.
Answer: A, C
